DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

the claim 1 embodiment: a boundary acoustic wave device where the thickness of the electrode is determined so that the acoustic velocity of the Stoneley wave is lower than that of a slow transverse wave propagating through the dielectric substance and that of a slow transverse wave propagating through the piezoelectric substance;

the claim 2 embodiment: a boundary acoustic wave device wherein the duty ratio of strips forming the electrodes is determined so that the acoustic velocity of the Stoneley wave is lower than that of a slow transverse wave propagating through the dielectric substance and that of a slow transverse wave propagating through the piezoelectric substance;

the claim 3 embodiment: a boundary acoustic wave comprised of LiNbO_3 , wherein Euler angles of the piezoelectric substance are in the ranges shown in Table 1 and the Stoneley wave has an acoustic velocity of 3,757 m/sec or less;

the claim 6 embodiment: a boundary acoustic wave device wherein the density of the electrodes, their thickness and the wavelength of the Stoneley wave are specifically represented;

the claim 8 embodiment: a boundary acoustic wave device wherein the density of the electrodes, their thickness and the wavelength of the Stoneley wave are specifically represented and of different ranges than the claim 6 embodiment.

Art Unit: 2834

The species are independent or distinct because they have different structural requirements.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is the most generic though not precisely so.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.
